

Abrasion Advanced Ceramics

Besides standard alumina wear resistant ceramics, customized design technical cermaics offered from chemshun

Wear Resistant Ceramics for High Wear Applications

Chemshun offers several alumina ceramics materials for high-wear, severe-service industry applications .

Chemshun **wear resistant ceramics** contains 92% alpha alumina & 95% alpha alumina , offer exceptional hardness and chemical corrosion resistance to maximize performance in extreme wear environments.

Chemshun Ceramics have our own research department, we can design and produce the different shapes products according to your different equipments
